TIM

IT SPECIALIST / PYTHON DEVELOPER

t.me/becarefulx titbob000@gmail.com github.com/toyotii toyotii.github.io
Moscow

SUMMARY

I build Telegram bots, Mini Apps and integrations in Python. I write APIs, connect external services and deploy applications on Linux.

EXPERIENCE

SET LEADERS

IT specialist

- Automated invitations, reminders and member support requests with a Telegram bot.
- Integrated a forum registration form with the team's internal tracker.

TRADING SIGNAL SYSTEM

Commercial project

- Built a seven-stage pipeline for Telegram posts and screenshots, LLM parsing, signal tracking, operator approval and Bybit orders.
- Demo account by default, risk limits, trade simulation and backtesting.

PROJECTS

FITBRO

Telegram Mini App

- Nutrition and workout tracker with Open Food Facts search and barcodes, calorie and macro tracking, workouts and team progress.
- Python, aiohttp, aiogram, SQLite. Server-side verification of signed Telegram initData.

CDB

Timetable bot

- Yandex Calendar import, timetable images, reminders and .ics subscriptions. The parser and renderer are open source under MIT.

SCREWSEC

Web service

- Generates information security documents for small businesses. Yandex Cloud, Cloudflare Workers AI and PDF export.

EDUCATION

ITHUB COLLEGE, MOSCOW

Information security

SKILLS

DEVELOPMENT

Python, JavaScript, aiogram, Telethon

APIS & INTEGRATIONS

aiohttp, httpx, n8n, webhooks, Telegram Mini Apps

DATA

SQLite, Google Sheets API, Open Food Facts

LLM

Groq, Cloudflare Workers AI, vision models

INFRASTRUCTURE

Linux, Docker, systemd, nginx, Yandex Cloud

TESTING

pytest, network mocks, offline tests

INTERESTS

Wireless systems: Sub-GHz, NFC and BLE. I experiment with a LilyGO T-Embed CC1101 running Bruce.
